

# FAITS

## FAULKNER ADVISORY FOR INFORMATION TECHNOLOGY STUDIES

*THE PREMIER information technology reference library designed  
exclusively for the academic community*

**FREE PREVIEW AVAILABLE** ▶

*See inside for details*

## FAITS offers a broad range of reports plus vendor directories and a comprehensive glossary of IT and related terms.

- **Technology Tutorial** reports provide intelligence about emerging and mature technologies.
  - **Marketplace** reports offer an excellent way to stay current on all the latest trends and advances in the IT and communications market segments you care about.
  - **Implementation Guide** reports provide users with the know-how to keep a project running and on budget.
  - **Standards** reports examine the major IT and communications standards and protocols currently in place.
  - **Product Profile** reports provide a concise summary of the leading products and suppliers, examine product strengths and limitations, and analyze current pricing strategies.
  - **Company Profile** reports review business goals, sales and marketing strategies, and financial stability of the leading vendors.
  - **Comparison and Selection Guide** reports offer the intelligence users need to make the BEST product and service selections.
- 

**Just a few of the academic institutions who have used FAITS reports**

UNIVERSITY OF PENNSYLVANIA • UNIVERSITY OF TORONTO • COLUMBIA • UNIVERSITY OF NORTH CAROLINA  
BALL STATE • VILLANOVA • DARTMOUTH • WILLIAM & MARY • DEPAUL

## An integral research tool used by leading institutions worldwide

**FAITS** is a one-of-a-kind technology reports library that was built especially to serve the needs and requirements of the academic community.

Continually updated and fully searchable, **FAITS** contains hundreds of technology reports that are meticulously researched, plainly written, uniformly formatted, and easy to understand.

**FAITS** reports are designed to help students, instructors, and administrators learn about and keep up with the critical issues, emerging trends, products, services, and vendors driving the IT industry. Topical coverage areas include IT infrastructure, telecommunications, wireless technology, data networking, convergence, security, enterprise systems, the internet, and technology vendors.

Convenient links to several online technology and business news resources, as well as direct links to a wealth of bibliographic resources covering computer science, mathematics, and more, are included.

**FAITS** reports are written by knowledgeable and experienced technology professionals who work or have worked in academia, private industry, or government.

Browse the **FAITS** database by subject area, report type, or quickly search the entire library by keyword. The database search engine is fast and highly responsive. Reports are listed by relevancy to the search and contain capsule summaries to help you determine their mission-specific usefulness. The engine also makes finding related reports quick and easy.

*The most  
comprehensive  
and useful  
library of  
Web-based  
technology  
reports  
available*

# Here are just a few ways **students, instructors, and administrators** are putting **FAITS** to work:

## Students

- Prepare for exams, oral presentations, and in-class discussions.
- Organize research and prepare content-rich term papers.
- Learn about emerging technologies and their impact on business and society.
- Get to know the leading players in the IT industry and prepare for intern and post-graduation employment interviews.

## Instructors

- Enrich curriculum and text support materials.
- Develop ideas for new courses, including evening adult education programs.
- Organize classroom discussion around pertinent **FAITS** reports.
- Use **FAITS** reports as source material when writing journal and newspaper articles, books, and public presentations.

## Administrators

- Keep in front of emerging technologies and understand how these technologies can play a key role in helping improve administrative and operational performance.
- Discover ways technology can help contain essential, but costly and escalating, IT expenditures.
- Become technology savvy and communicate more effectively with students, technology department heads, instructors, IT personnel, and administrative staff.

# FREE PREVIEW

No cost.

No obligation.
