SMP guest authors and contributors are industry practitioners.

Many have served in key corporate, academic, or government security advisory positions. Some are active in the security lecture and seminar circuits or teach at the university and graduate school levels. A number have been published in the leading industry and business journals and are authors of several security-related books.

Here's what you get with your **SMP** subscription ...

- New reports available at our Web site every month covering facility security, IT and network security, financial and legal security, business continuity, biometrics, risk and crisis management, public safety, personnel security, and security technology
- CSO Digest—A weekly electronic news digest summarizing all of the major security industry news, events, and happenings
- Access to all archived reports

● Don't put your organization at risk—be prepared to meet security challenges head-on.
